Usage and Licensing

This dataset is provided for academic, research, and educational use. Users are required to cite the sources listed above when reproducing, redistributing, or adapting results derived from these data. No warranty is provided regarding completeness or accuracy. The dataset and codebook are shared “as is.” For questions, clarifications, or collaboration inquiries, please contact kenneth.bunker@uss.cl.

Description

The Chilean Political Landscape Dataset (CPLD) compiles district-level indicators of electoral competition, party system structure, and institutional design across multiple decades of Chile's democratic experience. The dataset integrates electoral, institutional, and demographic variables to facilitate comparative and longitudinal analyses of Chile's evolving political landscape.

Warnings and Notes

- All calculations and data transformations were performed in R. Users should verify numerical results if importing into other software (e.g., Stata, SPSS, or Python).
- Missing or NA values may appear in specific indicators due to incomplete historical data. These are intentional and reflect data availability.
- Users should review each variable's source information and description before aggregation or statistical modeling.
- The dataset was tested on macOS but should function identically on other operating systems with compatible R versions.
- Please report detected errors or inconsistencies directly to the author.

Note

This document was automatically generated using R to ensure reproducibility. New releases of the dataset and codebook will be uploaded to Harvard Dataverse as new data become available. No prior warning may be given for updates or revisions. Any feedback, corrections, or enhancement suggestions are welcome.
